

Orion

Not just an assistant. A companion.

Orion

The Current AI Landscape: A Challenge

Today's AI assistants are often generic, residing solely in the cloud. This leads to several critical issues for users:

Privacy Concerns: Personal data is constantly sent to remote servers.

Lag and Latency: Cloud-only processing introduces delays.

Limited Adaptability: Lacks true contextual understanding of the user's immediate environment.

Orion: The Hybrid AI Solution

Orion reimagines the personal AI assistant, blending edge computing with secure cloud fallback to deliver unmatched privacy, speed, and contextual intelligence.

Personal

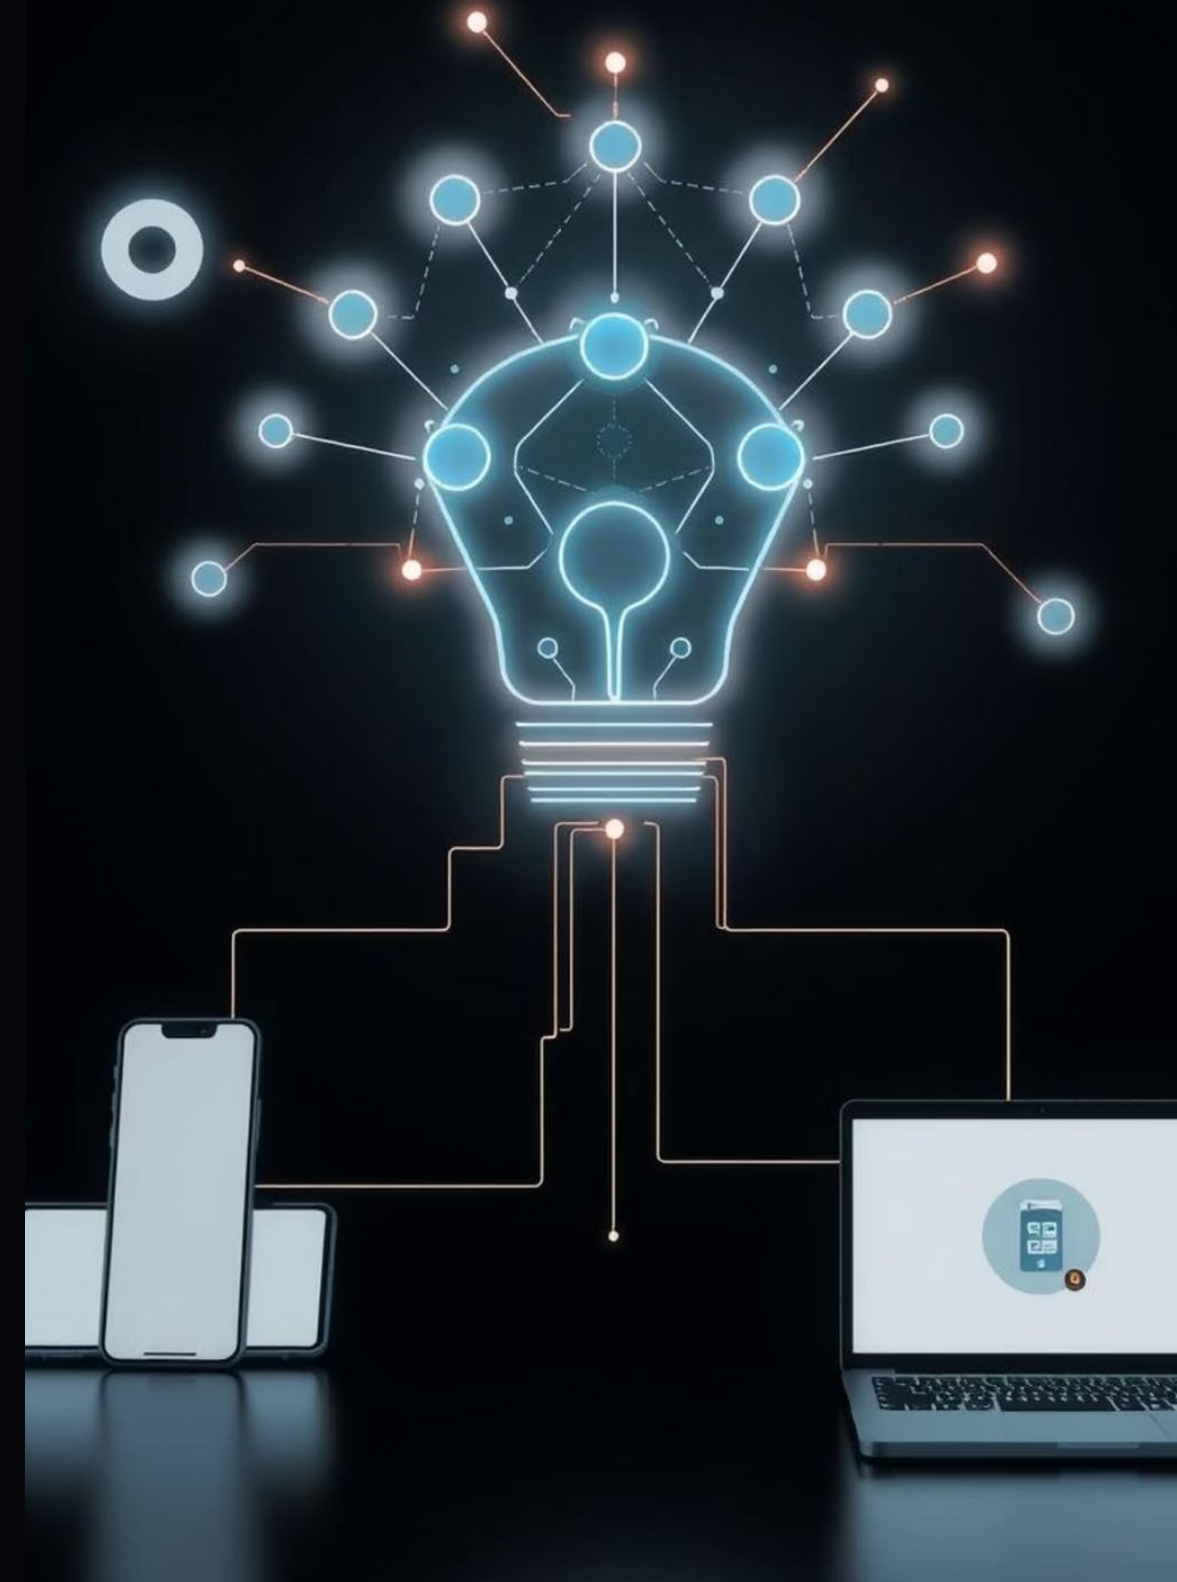

Learns and adapts to your unique needs and preferences locally.

Private

Local LLM ensures sensitive data remains on your device, by default.

Context-Aware

Utilizes edge processing for real-time understanding of your immediate environment.

Core Capabilities

Orion integrates advanced AI features designed to streamline your life with intelligent, seamless interaction.

Voice Conversation

Natural, fluid dialogue powered by advanced speech processing.

Persistent Memory

Remembers past interactions for truly personalized assistance.

Deep Personalization

Adapts to your habits, preferences, and daily routines.

Schedule Management

Proactive assistance for your appointments and tasks.

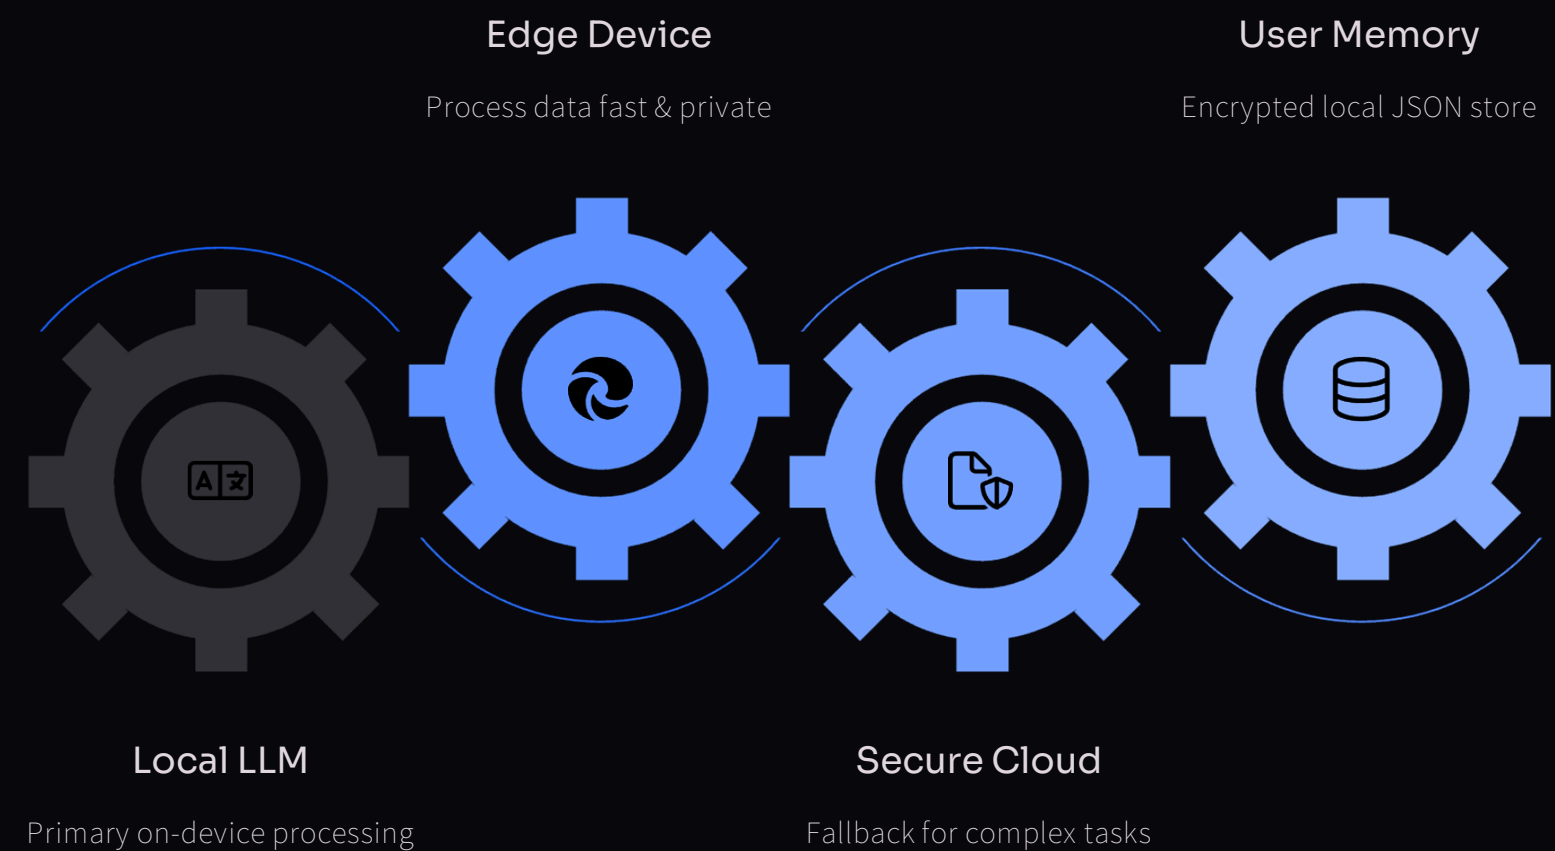

Privacy-First Design

Your data, your control, with local processing as the priority.

Orion's Hybrid Architecture

Orion's innovative architecture ensures optimal performance, privacy, and reliability by leveraging both edge and cloud processing.

This hybrid approach prioritizes on-device processing for speed and privacy, using the cloud only when necessary for more complex tasks or synchronization.

Why Orion Stands Apart

Orion

Deeply Personalized: Learns and evolves with you.

Privacy-Centric: Local LLM, minimal cloud interaction.

Expandable: Open architecture for future integrations.

Future-Ready: Adaptable to new AI paradigms.

Other Assistants

Generic: One-size-fits-all approach.

Cloud-Reliant: Constant data transmission.

Limited Ecosystem: Often locked to specific platforms.

Static: Slower to adapt to evolving user needs.

Our Journey Ahead: The Orion Roadmap

We're building Orion in carefully planned phases, ensuring robust development and continuous innovation.

Phase 1: Software Launch

Release of the core Orion software for existing smart devices, focusing on foundational AI features and privacy architecture.

1

2

3

Phase 3: Advanced AI Integrations

Expanding Orion's capabilities with sophisticated multi-modal AI, proactive health monitoring, and advanced automation.

Phase 2: Hardware Integration

Introduction of dedicated Orion edge hardware, optimized for local LLM performance and seamless user experience.

The Orion Team

Building the future through collaborative innovation

AI/LLM Lead

Model selection, fine-tuning, inference
optimization

Skills: Kaggle, PyTorch, Hugging Face, llama.cpp

Project Lead (Gourav Mukherjee)

Roadmap orchestration, GitHub coordination,
integration

Skills: Leadership, Git/GitHub, testing, vision

Data & Memory Engineer

RAG, embeddings, dataset curation, memory
systems

Skills: Python, Pandas, LangChain, vector
databases

Device & Infrastructure Engineer

Jetson/Pi deployment, Docker, CUDA optimization

Skills: Linux, Docker, GPU acceleration,
networking

Web/UI/UX Developer

Orion's frontend interfaces & dashboards

Skills: HTML/CSS/JS, React, WebSockets, Figma

Security & Privacy Engineer

Encryption, data isolation, secure storage,
compliance, threat modeling

Skills: Cybersecurity basics, cryptography, secure
API design, authentication/authorization

Redefining Human-AI Interaction

Orion is more than an assistant; it's a paradigm shift towards a future where AI empowers, protects, and understands you.

Boosting Productivity: Intelligent automation and context-aware assistance free up your time.

User Control: Puts you firmly in charge of your data and your digital life.

Seamless Integration: Works across all your devices, understanding your needs wherever you are.

Join the Journey

We are at the cusp of a new era for personal AI. Orion needs visionary partners to realize its full potential.

“We believe in a future where AI enhances humanity, not replaces it. Orion is that future.”

Let's Build the Future,
